

Do You Have Dry Eye Symptoms?

Are you experiencing any of these?

- DRYNESS
- REDNESS & IRRITATION
- GRITTIENESS
- TEARS & WETNESS
- BLURRIENESS
- STINGING
- BURNING
- LIGHT SENSITIVITY

If so, you might have dry eye. There's no cure, but early treatment can help preserve and restore vital gland function. Ask your provider at Socialite Vision if the TearCare® System is right for you.

Are You Relying on Eye Drops for RELIEF?

While drops can offer temporary comfort, they often don't treat the underlying cause—Meibomian Gland Dysfunction (MGD), or blocked oil glands. Over time, this can make symptoms worse. TearCare® targets the root cause. It's an in-office, doctor-provided therapy that helps adults with evaporative dry eye caused by MGD.

How Can TearCare® Help You?

Convenient, doctor-provided treatment completed in one visit

May reduce the need for daily prescription drops

Results from a single therapy can last up to a year

SOCIALITE VISION

4871 PGA Blvd. Palm Beach Gardens, FL 33418

MEIBOMIAN GLANDS

GOBLET CELLS

IMPROVES:

MUCIN LAYER

AQUEOUS LAYER

LIPID/OIL LAYER

Why Choose TearCare®?

TEARCARE® IS SHOWN TO BE SUPERIOR TO THE #1 DRY EYE PRESCRIPTION.

While most prescription drops treat inflammation, TearCare® works by clearing blocked oil glands—the root cause of dry eye.

By switching from drops like Restasis® to TearCare®, you can:
Experience long-lasting relief
Enjoy results without daily hassle

Don't Wait for Your Symptoms to Worsen

It's time for TearCare®. Ask your provider at Socialite Vision to learn more about how this advanced, in-office treatment can help you find lasting dry eye relief.
